... highlighting new resources from ProQuest that are designed to empower researchers to achieve more success, whether it's the next great scholarly breakthrough or a better grade on a research paper. On the following pages you'll find an extraordinary range of content and technology solutions designed to provide rich support for these ambitions and more.

ProQuest's unique resources connect researchers and information seekers with unlimited opportunities to discover, grow, and thrive. We provide access to the deepest and broadest variety of content that researchers need—scholarly journals, ebooks and print books, news sources from historical to current and popular to specialist, dissertations, working papers, an extraordinary range of carefully digitized primary sources, and much more.

Our workflow solutions are designed to help librarians and researchers get the most out of their investments—whether it's money, time, effort or infrastructure—to result in the most productivity and greatest success.

In 2016 ProQuest wants our enthusiasm to inspire you, and in turn to fuel the inspiration of those you serve. We believe that when we apply our strengths in partnership with others we open endless possibilities to achieve, excel and contribute to a better world.

With that to inspire us, what will you do?

Inspire users with access to a universe of content

Librarians tell us that ProQuest resources are among the most valued in their libraries. One reason is that we're different from publishers that focus on journal content alone. We go miles further—providing diversity and depth with unique, specialized content collections to serve specific researcher needs. Easily discovered, expertly organized, and designed to drive superior learning, creativity and research outcomes, our content helps your library to become the source of more insights, more breakthroughs, more success.

Books

Ebook Central™

ProQuest is addressing the complexities and challenges surrounding ebooks with Ebook Central, an intuitive, user-friendly platform that simplifies ebook workflow for both librarians and patrons. Its goal: support librarians with seamless systems for ebook discovery, selection, acquisition, administration and reporting. Users will be empowered to reach new levels of success because Ebook Central has been designed specifically for research productivity, from discovery to reading to bookshelf.

Ebook Central simplifies libraries' digital migration by:

- **Enabling access and discovery of ProQuest's vast selection of ebooks**
- **Providing librarians with real-time usage and expenditure analytics**
- **Putting ebooks' inherent flexibility to work for both patrons and librarians**

Ebook Central will have an astonishingly broad selection of content, with over 760,000 titles and 1,350 imprints from more than 650 publishers. Various purchase options will be available, including 1-user, 3-user, Non-Linear and Unlimited Access, as well as our subscriptions and Demand-Driven Acquisitions (DDA). Ebook Central's aim is to be a user-focused, world-class ebook platform.

From our wide selection of content, to our innovative and flexible acquisition models, to our technology architecture designed to support today and tomorrow, ProQuest is leading the way in ebook research.

Access-to-Own

In collaboration with libraries and publishers around the world, ProQuest will pilot a new Demand-driven Acquisition model called "Access-to-Own." Developed to enable librarians to expand DDA, "Access-to-Own" offers a model where all rental spend is applied toward ebook ownership and a solution for publishers who may be unsure about putting front-list content in DDA programs. The pilot for Access-to-Own will launch in mid-2016, with 14 major academic publishers already signed on including Taylor & Francis, Cambridge University Press, Oxford University Press, SAGE, Taylor & Francis Group (which includes Routledge, CRC Press, and Ashgate), Wiley, Berrett-Koehler Publishers, De Gruyter, Guilford Press, John Benjamins, World Bank Publications, University of Pennsylvania Press, Indiana University Press, University of North Carolina Press, University Press of Colorado, and Fordham University Press. Many more are expected to participate in this exciting new program.

University Press Ebook Subscription

The first resource of its kind, the University Press Ebook Subscription is a focused, critical mass of titles that carry the high standards of their affiliated institutions and researchers, including rigorous peer-review, deep scholarship, and influential connections to community and society—qualities which define the value of university press content. Assembled by our on-staff collection development team, this subscription helps librarians to quickly build a carefully curated foundation across disciplines, and leverages ProQuest's partnerships with more unique university press publishers worldwide.

OASIS

In 2015, ProQuest welcomed Coutts Information Services and its OASIS (Online Acquisitions and Selection Information System) Web-based system for searching, selecting and ordering print and electronic titles. OASIS features the broadest title database in the industry with powerful search tools to locate titles quickly and efficiently. Coming soon are a variety of enhancements that will make OASIS even more powerful and productive:

New Integrations

- OASIS integration with the Alma library management system
- OASIS integration with the next generation ebook platform from ProQuest—Ebook Central
- Availability of ebooks hosted on publisher ebook platforms

New Features

- A new book selection service will aggregate metadata from multiple sources into a single streamlined selection interface that will also include web-based creation and display of profiles.

New Enhancements

- Streamlining of the popular “Search Orders” function, including easier access to invoices
- Simplified title records with all linked print and ebook options displayed in a single place
- Improved platform speed and stability including faster search and login

Print Joins Digital at ProQuest

In June 2015 ProQuest welcomed Coutts Information Services into the family. Librarians can now turn to one source of rich, diverse content, our trademark digital resources now in addition to 25 million print titles from Coutts. Quite simply, ProQuest collections give librarians and researchers the widest selection of resources imaginable to meet their unique needs.

Humanities and History

Early European Books

Early European Books is an ambitious ongoing program serving researchers of the early modern period with exclusive content. Its aim: to digitize the extensive collection of all printed works in Europe between 1450-1700. New modules include:

Collection 7

This collection includes materials from Koninklijke Bibliotheek in The Hague, London’s Wellcome Library and Copenhagen’s Kongelige Bibliothek. Subject matter is an eclectic mix ranging from theology to science, mathematics to natural history, astronomy and philosophy, from state papers and histories to accounts of exploration and adventure. The contributions from the Wellcome Library add to an already extensive selection of early modern texts on medicine, science and alchemy, in addition to titles covering classical literature, philosophy and religion.

Collection 8

Released in September 2015, the first part of Collection 8 features about 70 percent of the collection’s total planned content—more than 3,200 titles and over 1.12 million pages of content. A selection drawn entirely from works held at the Bibliothèque nationale de France in Paris, Collection 8 reflects early modern French intellectual, spiritual, political and everyday concerns, while at the same time reflecting a broader European outlook marking the Enlightenment period, a time of radical scientific advancement, overseas exploration and expansion of the known world.

Early English Books Online – TCP II

Early English Books Online is the definitive online collection of early printed works in English and works printed in England. Including more than 130,000 titles dating before 1700, these works are made more discoverable through an interface tailored specifically for early modern scholars. A second collection of more than 28,000 works of searchable transcriptions, available exclusively through ProQuest, has recently been added to the collection.

History Vault

These important archival collections document the most widely studied topics in 18th- through 20th-century

American history. A virtual anthology of primary sources, History Vault's sweeping coverage of U.S. History spans from the American Revolution to the last years of the 20th century. New modules include:

Confidential U.S. State Department Central Files, 1960-1969

This module focuses on those U.S. State Department Central Files that have not been microfilmed by the National Archives or distributed by other publishers. It contains a wide range of sensitive materials from U.S. diplomats in foreign countries: reports on political, military, and socioeconomic matters; interviews and minutes of meetings with foreign government officials; important letters, instructions, and cables sent and received by U.S. diplomatic personnel; and reports and translations from foreign journals and newspapers. This collection is presented in three separate geographic modules:

- Highlights of the **Europe and Latin America module** include international reaction to the Bay of Pigs invasion, and East-West tensions in Berlin, Germany.
- Among issues in the **Africa and Middle East module** is the pivotal 1964 Rivonia trial of Nelson Mandela and leaders of the African National Congress.
- Topics in the **Asia module** cover the Cultural Revolution in China, and relations between Buddhists and the Vietnamese government.

Coming soon! FBI Confidential Files and Radical Politics in the U.S., 1945-1972

This module contains records from the FBI and the Subversive Activities Control Board. Under the leadership of the infamous J. Edgar Hoover, the FBI vigorously investigated and tracked the activities of Communist groups, Communist-front groups, and other radical organizations in the United States. Highlights include Hoover's office files; documentation on the FBI's so-called "black bag jobs," as they were called before being renamed "surreptitious entries"; and the "Do Not File" File. Prominent subjects covered in the "Surreptitious Entries" file pertain to the Socialist Workers Party and the Weather Underground, both dating from the early 1970s. The records of the Subversive Activities Control Board (SACB), an invaluable resource for the study of left-wing radicalism of the 1950s and 1960s, are also included in this module.

Southern Life and African American History, 1775-1915, Plantations Records, Parts 1 and 2

History Vault's Plantation Records document the far-reaching impact of plantation life on both the American South and the nation. Drawn from major repositories throughout the South, Plantation Records illuminates nearly every

aspect of plantation life. Because the plantation was a commercial enterprise, record keeping was essential. Many planters kept journals, crop books, overseers' journals, and account books in remarkable detail. Family members often kept personal diaries and corresponded extensively with friends and relatives near and far. Topics covered include business operations and day-to-day labor routines to family affairs, the roles of women, racial attitudes, relations between masters and slaves, social and cultural life, and shared values. Tensions and anxieties that were inseparable from a slave society are revealed with a fullness and candor unmatched by other available sources.

Coming soon! Women at Work during World War II: Rosie the Riveter and the Women's Army Corps

A highly unique resource, this module contains two major sets of records documenting the experience of American women during World War II: Records of the Women's Bureau of the U.S. Department of Labor, and Correspondence of the Director of the Women's Army Corps. Primary sources document a wide range of issues pertinent to women during this time of turbulent change, including studies on the treatment of women by unions in several midwestern industrial centers, and the influx of

women to industrial centers during the war. Topics covered in records and correspondence include women's work in war industries, pivotal issues like equal pay, childcare and race, and extensive documentation on the women who joined and served in the Women's Army Corps as WACs.

Philosophy Database

Researchers who require access to modern and historical full-text journal content are consulting contemporary dissertations to conduct their studies in ever greater numbers. Philosophy Database is a unique new full-text

journal and dissertations database specifically designed for researchers of all aspects of the interdisciplinary field of Philosophy. Philosophy Database contains the full-text of more than 160 philosophy scholarly journals as well as more than 1,000 modern and influential dissertations. Content covers the period 1860 to the present and is updated on a regular basis with new issues and new journal titles.

Historical Periodicals

The Harper's Bazaar Archive

First published in 1867, *Harper's Bazaar* was America's first fashion magazine and presents a rich record of style, fashion and culture from the mid-19th century on, featuring the work of leading designers, photographers, artists, illustrators, writers and legendary editors-in-chief such as Carmel Snow and Diana Vreeland. In bringing this collection together digitally for the first time, ProQuest creates a comprehensive digital primary resource for the study of material culture, art, fashion, design, gender studies, marketing, brand history, and more.

Women's Magazine Archive

This rich resource comprises archival runs of leading women's consumer magazines of the 20th century. A unique collection of many of the most eminent and socially significant titles in this field, each of these monthly titles chronicles decades of social, historical and cultural trends. The titles are considered essential primary sources by many researchers in the fields of gender studies, social history, business and marketing, fashion, media, and more.

British Periodicals IV

Offers a vast body of contemporary comment on the interests, attitudes, and events across three centuries of British history, culture, and politics. This module will offer full-archival coverage of several leading magazines of the period including *The Field* (1853-2005), *Tribune* (1937-2005), *The Highway* (1903-1959), *War Weekly* (1939-1941).

Country Life Archive

This comprehensive archive of the quintessential English lifestyle magazine captures U.K. culture across the 20th century, particularly fine art and architecture, the great country houses, and rural living. Country Life Archive presents a chronicle of more than 100 years of British heritage with the content of every page fully searchable.

Periodicals Index Online Update

The latest release of Periodicals Index Online includes significant additional indexing, with new titles being included and the coverage of many existing titles being extended. The total number of article citations in the index now stands at more than 22.5 million.

Government Documents and Social Science

Digital Security National Archives (DNSA)

CIA Covert Operations II: The Year of Intelligence, 1975

This DNSA module expands on the National Security Archive's collection of declassified CIA materials, including CIA Covert Operations: From Carter to Obama, 1977-2010, with a focus on the critical year 1975—the "Year of Intelligence."

Coming soon! U.S. Nuclear History, 1969-1976: Weapons, Arms Control, and War Plans in an Age of Strategic Parity

A vast majority of recently declassified documents are published for the first time in this important compilation detailing nuclear weapons policies of the Nixon and Ford administrations, a period vital to understanding developments of subsequent years. In our post-Cold War world, nuclear proliferation, arms control, and atomic weapons deployment policies still remain at the core of public concern over global security and peaceful international relations.

House of Lords Parliamentary Papers

Partnership with the National Library of Scotland enabled the creation of this first digitized collection of the 19th-century House of Lords Parliamentary Papers. This archive covers wide areas of social, political, economic and foreign policy, sources indicative of the direction and interest of the Lords, previously considered lost to researchers and scholars, from a time when the House of Lords wielded considerable power.

ProQuest Wins “Best Interface” Award for Updated Platform

The Charleston Advisors 15th Annual Readers’ Choice Award recognized ProQuest’s newly-enhanced platform in its honoring of the best digital “products of interest” to libraries. Vice President of Research Tools, Services and Platforms, Allan Lu, accepted the award stating, “We are delighted to have received this award, and this endorsement highlights our focus on user experience.”

“It is much more intuitive and easy to use than previous versions. It includes improved document viewing, easier navigation and better ADA compliance.

Kudos to ProQuest.”

– *The Charleston Advisor, October 2015*

Indian Claims Insight

Via a unique interface researchers can access Indian Claims Commission materials and actually trace the history of claims by Indian Nation and/or geographic location from 1789-present. Content includes a wide range of materials—including documents and maps—never before available online.

Regulatory Insight

As a companion to Legislative Insight, this resource offers administrative law histories from 1936-2014 organized by statute. Researchers can retrieve administrative law content, gain insight into the history of administrative law and conduct original research. Customers with ProQuest products such as Legislative Insight, Executive Orders, and/or Presidential Proclamations can link directly between products to facilitate research.

Historical Statistical Abstracts 3

Completing the archive of one of researchers’ most valued reference tools, this third installment includes years 1878 to 1928. Of note, tables that were once provided as printed tables only are now available as Excel spreadsheets.

Executive Branch Documents 2A, 2B

The wide range of content in Executive Branch Documents, 1789-1932, makes it suitable for serious researchers in all academic disciplines, including history, political science,

social sciences, physical sciences, engineering, and business. It is also of value to genealogists, as it includes many lists of names.

Newspapers

Newspapers.com

Newspapers.com Library Edition is an extensive database that provides online access to 3,000+ historical newspapers. Dating from the early 1700s into the early 2000s, it contains full runs and portions of runs of well-known, regional and state titles to small local newspapers in the United States and other countries.

Invaluable for researchers, historians, genealogists, teachers and students, Newspapers.com Library Edition provides greater opportunities for longitudinal and comparative analysis of historical events, people and places, and is a great source of information for genealogists. With ongoing updates and new content continually being added, there’s always more to be discovered.

Genealogy

Fold3 Library Edition

Fold3 Library Edition by Ancestry is the premier collection of historical U.S. Military records, with more than 400 million records. Unparalleled military content for history and genealogical research and a rich enhancement to the ProQuest classic: Heritage Quest® Online, now powered by Ancestry.

Multidisciplinary

ProQuest Central

The ultimate cross-disciplinary research tool, ProQuest Central brings together our most widely used databases to create the largest single academic resource available today—and continues to grow with new content.

Along with thousands of essential journals, ProQuest Central contains diverse content that scholars tell us is critical to their academic research, including news, market information, dissertations and pre-print working papers.

Major Titles

More than 800 new titles have been added, including 500 scholarly journals across all major disciplines, from publishers including Elsevier, Springer, and Oxford University Press.

Diverse and Local Content

130 new sources, including *The China Daily*, *The Week*, and 27 newspapers and trade journals from McClatchey.

New Conference Proceedings

New conference records from providers including *European Conference on e-Government* and *Academy of Business and Retail Management*

Company Records

More than 44 million company records from Experian have been added to ProQuest Central's collection

New Market Information

Newly acquired market intelligence from providers including Economist Intelligence Unit, Euromonitor, and Reportal

Curriculum-Aligned Training Videos

Hundreds of new training videos from National Institute for Health and INTELECOM Sociology Video Collection

Regional Resources

Each of these geographic databases provides a collection of scholarly titles covering major areas of study including business, science, technology, engineering, social sciences, education, and humanities. These databases allow librarians to provide access to the latest articles and scholarship from a particular country or region with all the functionality of the ProQuest interface. Geographic databases include:

- Australia & New Zealand Database
- Continental Europe Database
- East & Central Europe Database
- India Database
- Latin America & Iberian Database
- Middle East & Africa Database
- South & East Asia Database
- Turkey Database
- U.K. & Ireland Database

Science, Technology, and Medical

ProQuest's Science, Technology, and Medical collections continue to grow. New content includes:

Journals

Over 200 new titles from publishers like Springer, across major disciplines including medicine, nursing, biology, mathematics and physics.

Grey literature

Includes insurance reports from the Organisation for Economic Cooperation and Development, and conference papers from the Proceedings on the International Conference on Internet Computing (ICOMP).

New nursing training video clips

140+ video clips from respected provider MedCom were recently added to ProQuest Nursing & Allied Health, covering important topics like making an occupied bed and infection control. The videos were produced in 2014 and are expertly indexed for easy discovery.

Coming soon to ProQuest! Inspec®

The Institution of Engineering and Technology (IET) database, one of the world's most definitive sources of specialized scientific and technical literature, is coming soon to the award-winning ProQuest interface. Researchers, faculty, and students rely on Inspec's 15 million abstracts and specialized indexing to quality research literature in the fields of engineering, physics, electronics, and computing.

Workflow Solutions

ProQuest creates innovative solutions that make discovery, access and management of library resources simple and efficient. The company's massive knowledgebase, technology expertise and continual study of researchers' and librarians' workflows provide a foundation for innovations that eliminate tedious, redundant routines and enable users to focus on meaningful, high-value tasks that advance them toward their goals. Flexible and collaborative, ProQuest is a partner to librarians, students, and researchers of all types, enabling them to navigate and succeed in a complex print and digital environment.

Intota™

Expect the current version of Intota (v1) to gain improved Overlap Analysis functionality and cost data features. This will include enhancements to downloadable reports and new Provider Overlap reports. Customer feedback is driving a new ability to specify costs in both dollars and the original purchase currency, as well as options to input negative payments.

Looking ahead, significant improvements are planned for Intota (v2), enabling libraries to replace their legacy ILS process with transformative workflows designed to reduce overhead while simplifying the process of patron resource discovery and access.

Intota™ Assessment

Improvements to Intota Assessment include support for new formats in the Multimedia Report 1 (MR1), updated ACRL and SCONUL reports, the ability to facet all e-resource usage by fund, and increased accuracy in matching idiosyncratic statistics data against our Knowledgebase. Platform "power users" can create unique ad hoc reports for the entire collection—print and electronic alike—and incorporate valuable data from resources such as Books in Print and Resources for College Libraries.

Incorporation of a new, significantly enhanced Counter engine for the Intota system is on the horizon. Among the improvements this software brings are faster processing of COUNTER reports and better error detection and diagnostics.

ProQuest and Ex Libris Join to Speed Innovation for Libraries Worldwide

In 2015 ProQuest acquired Ex Libris Group, a leading global provider of library automation solutions. Together, the capabilities of ProQuest and Ex Libris span expertise in print, electronic and digital content, as well as solutions for library management, discovery and research workflows.

Joining forces will enable ProQuest and Ex Libris to enhance existing products and accelerate the development of new services for libraries. Together,

our companies can be more responsive in addressing critical challenges facing today's libraries—disparate workflows for print and digital resources, and navigation of ever-changing technology, content and user environments.

Expect great things from ProQuest and Ex Libris working together to make your library systems run smoother and more intuitively.

ProQuest Content in Google Scholar Makes Research Easier

Discovery has always played an integral part of ProQuest's goal to improve outcomes for libraries and their users, with emphasis on making content simple to discover and use. Now ProQuest's full-text scholarly content, including journals and working papers, is seamlessly indexed in Google Scholar.

This collaboration streamlines the research process: no more barriers between Google Scholar and the library's subscribed ProQuest collections.

- Increases usage: with an additional way for researchers to discover content, libraries benefit from increased usage of ProQuest collections.
- Linking is seamless: after searching Google Scholar, authenticated ProQuest users are recognized by the ProQuest platform and connected to full-text content.

This agreement with Google is just one in a series of ProQuest collaborations with other information providers, steps in a larger mission to support choice for libraries and their patrons.

360 Link

ProQuest continues to improve the research experience through 360 Link. 360 Link now includes additional enhancements which add to the major development work over the past year that fully re-designed the user interface and improved the linking success for researchers. The 360 Link improved user experience now features the integration and display of Ulrichsweb™ and Syndetic Solutions™ data for mutual customers, direct linking to Ulrichsweb, customizable Public Database and Title-level Notes display, Altmetrics.com integration, a new Citation Linker form, CrossRef Look up integration, and API improvements that include Index-Enhanced Direct Linking functionality.

Discovery

Summon Service Improvements to Relevancy Ranking Power Superior Resource Discovery

The Summon® algorithm has evolved significantly, improving the researcher's experience in exploratory searching, searching for specific topics, and searching for a known item. The result: it's quicker and easier for researchers find the most accurate information possible. As one customer said, "The results 'speak better' to the user and provide them with more help on how to expand their searches by the context of results."

Summon® Unified Index Expands Depth and Breadth
The breadth and depth of searchable content available in the Summon® service is unparalleled within the library industry, and the unified index continues to be the cornerstone of the ProQuest® discovery experience for users worldwide. The index increased by nearly 20%, with over 400 million records added. A wide spectrum of content was added, with journal and ebook collections supplemented by conference proceedings, technical papers, digital and film collections, and scholarly blogs.

Technology Tools

ProQuest SIPX—The Most Complete Course Materials Solution in Higher Education

ProQuest SIPX's scalable technology helps manage course materials in higher education, saving students and schools over \$3.67 million to date. Open, library-subscribed and publisher content combine in an intuitive cloud-based platform. Sharing course readings is easy and compliant, with fair use reminders for faculty and real-time analytics insights to instructors and libraries, and seamless workflow connections.

Easily configured for your institution's unique curriculum workflows and needs, SIPX saves students money and helps schools and libraries support more faculty at many leading and innovative schools including Stanford, Notre Dame, University of Illinois, Purdue, U Mass Amherst, and many others.

ProQuest Research Companion

Named a Best Database by School Library Journal, Research Companion is the flagship information literacy product from ProQuest, built to help students do more effective scholarly research and to support educators as they teach the core information literacy (research) principles of finding, evaluating, and using information. New single sign-on access is integrated into institutional directories, saving time for administrators and users, and protecting student privacy.

New and Improved RefWorks

Initial availability of a new ProQuest RefWorks begins in January. Combining the best of RefWorks and Flow, RefWorks is the next generation of reference management. It offers the trusted functionality you expect, plus a refined user experience, full-text management, collaboration and other features of a total reference management solution. As a unified solution the new RefWorks helps researchers by enhancing their ability to connect and collaborate, while assuring accuracy and efficiency in extracting, managing and outputting references and citations.

Summon®-SIPX Integration

In December 2015 ProQuest introduced a visionary new product to universities: Summon®-SIPX Integration. The new module is the most complete and convenient discovery and course materials combination in higher education. It showcases and extends the value of your library across campus—by making it easy for faculty to set up and assign course readings, bringing more exposure to library collections and open access content, and saving students a substantial amount on their course materials cost.

Summon®-SIPX Integration combines assets of two of ProQuest's newer and highly successful products. The Summon service® is an unparalleled discovery service that specializes in abstracting and indexing content. Instructors that discover great content they want to share with students can now easily click over into SIPX, a unique digital course materials solution that addresses a variety of copyright and cost concerns for universities and students. The solution increases

use of library content in classrooms and also takes care of any other readings instructors want to assign. In addition, SIPX's technology is flexible and offers multiple options to grow with rapidly evolving campus education and technology needs, into Learning Management Systems, course reserves or bookstore workflows, or online education.

How, specifically, will this new solution benefit you?

- Seamlessly integrates curriculum tools into the Summon service® for the first time increasing use and value of your investment in content and discovery tools, including deeper analytics and compelling dollar figures to present to campus leadership on the savings that your library generates for students in lowering the cost of education
- Summon-SIPX Integration is easy to implement with no user training necessary and is available with introductory pricing for current Summon users

Inspire learning, promote success

ProQuest provides access to the deepest variety of content that researchers need to succeed: scholarly journals, ebooks, news sources, dissertations, working papers, an extraordinary range of carefully digitized primary sources, and much more.

Easily discovered, expertly organized, and designed to drive superior learning and research outcomes, ProQuest content helps your library become the source of more insights, more breakthroughs, more success.
