

Bii's *Certified Inspection*™ process is fully approved by the FAA, JAA, CAAC and Thai DOA. These approvals allow Bii the unique opportunity to inspect and recondition all OEM bearing brands at a competitive price. We also maintain a Quality Management System registered in compliance with the international standard ISO 9000, and are constantly improving our industry-leading processes.

Bii understands your facility's need for dependable, high-performance bearing inspection services. Bii is the industry leader you can trust to provide the highest quality inspection services for all your aerospace and gas turbine applications.

Join the majority of maintenance facilities in the gas turbine industry who already benefit from the value and quality of Bii's reconditioning services. Contact your Bii service representative today for a complete, no-cost service assessment.
