

NOTES FROM *the* CLEVER CANINE

HELPFUL INFO FOR PET-FRIENDLY VACATIONS

“A vacation just isn’t a vacation without your best friend by your side. Good thing there’s a wide range of pet-friendly adventures out there for every getaway style. And that makes me a lucky dog, indeed!”

HAPPY TRAILS

If you loved summer camp as a kid, North Carolina is the place to revisit and share the experience with your dog. Rent a private cabin in the cozy town of Brevard, where you can enjoy hiking, biking, and fishing as well as customized pet training sessions. Tackle Agility Boot Camp together at the country’s only dog-dedicated campground. Or pair up for scent games, dock diving, paddleboat, and more at an annual weekend retreat for pets and their parents in Asheville.

LUXE DELUXE

Tennessee and Virginia are home to some of the country’s most accommodating luxury hotels, where the spoils of four-star hospitality extend to your furry pals. Amenities include stylish beds, gourmet treats, massage and grooming services, and even a dedicated pet concierge. One popular destination boasts a world-famous Doggy “Yappy” Hour, while another invites dogs to join their owners for al fresco dining at the in-house restaurant.

SHORE TO PLEASE

From Chesapeake Bay to Jekyll Island, the Southern coast has lots to offer tail-wagging tourists and their loved ones. Explore the beach and maritime forests together in South Carolina’s Hunting Island State Park. Rent a seaside haven with your family at Nags Head. And for a truly wag-worthy experience, visit Florida’s renowned Dog Beach and Paw Playground, where pups can run free, chase balls in the surf, and hose off in a dog shower.

Dogs are also begging for NexGuard™. From the makers of FRONTLINE® Plus, NexGuard kills adult fleas before they lay eggs. Plus, it kills the American dog tick. All in a delicious soft, beef-flavored chew that dogs love. To learn more, ask your vet or visit NexGuardForDogs.com

IMPORTANT SAFETY INFORMATION: NexGuard is for use in dogs only. The most frequently reported adverse reactions include vomiting, dry/flaky skin, diarrhea, lethargy, and lack of appetite. The safe use of NexGuard in pregnant, breeding or lactating dogs has not been evaluated. Use with caution in dogs with a history of seizures.
